

How Sustainability contributes to Schneider differentiation

FUTURE

The Schneider sustainability newsletter #1 - January 2019

“

Accelerating
Schneider Electric's
Transition
to Carbon
Neutrality

Jean-Pascal Tricoire
Chairman & CEO, Schneider Electric

Access to energy

Launched in 2009, the Access to Energy program aims at helping underprivileged people to gain access to energy by creating a virtuous circle combining business, innovation and responsibility.

At Schneider Electric,
we quantify how much our
offers help our clients cut
their CO₂ emissions

With EcoStruxure, our IoT-enabled architecture, we help companies be more energy efficient and reduce their CO₂ emissions. To demonstrate this positive impact on climate, Schneider Electric embarked into quantifying CO₂ savings delivered to our customers.

Our ambition is to prove

100 Mtons CO₂

saved through our
EcoStruxure offers

from 2018 to 2020

Our 2017 Variable Speed Drives sales
will allow our customers to save

10 Mtons CO₂
