New principles of responsibility that meet a growing demand from stakeholders

Our principles of RESPONSIBILITY

Launched in 2002, structured by stakeholders, coherent with company values:

1. Human Rights and People Development
   - Our wealth is human capital, at the heart of our values and our new value proposition as an employer.
2. Ethical business conduct
   - Clarified and reinforced rules of compliance, with “to be done/to be avoided” lines of conduct.
3. Digitally trusted and secure
   - A new section totally devoted to digital solutions.
4. Act for the environment
   - A separate section reflecting our actions and our impact on our complete value chain.
5. Responsible corporate citizenship
   - Schneider represents a community, interacting with many different stakeholders.
Our strategy is delivering outgrowth vs. the sector
Growth momentum continues in 2019

- Strong revenue growth
- Sustained profit momentum
- Strong shareholder focus

Organic growth above market driven by strategic alignment to secular GDP+ demand trends, Energy Transition, and Industry 4.0

Portfolio optimization continues

- The Group has identified several assets totaling c. €1.5 to €2.0 B in revenues that are less strategic in the long run.
- Progress has already been made with Pelco divestment:
  - Sale to Transom signed in Q1, closed in Q2
  - €169 M of sales in 2018
  - c.+10 bps accretive to the Group adjusted EBITA margin on a full year basis
  - Non-cash loss on disposal of up to €250 M to be excluded in net income calculation for dividend

Expect further progress in 2019
Preparing the next steps for further increase in organic financial performance

Objective:
Increased and targeted investment in the coming years on key drivers which will enhance long-term organic top line growth and drive margin improvement beyond the +200 bps ambition post 2021.

We shall increase investment over the next 4 to 5 years on core drivers of performance:
- R&D and innovation
- Digital
- Sales force size and skills on our priorities
- Marketing and communication

New investment will have to be neutral at the margin level and therefore financed by increased productivity on our 'non-Productive' SFC (back and middle office, global functions...).

- Targeted yearly productivity to increase from 2018 levels
- Total redeployment could represent up to 10% of total SFC over the next 4 to 5 years

The cash investment for this additional effort is expected to bring the average annual restructuring cost over the next 4 years to a level between €200 to €250m.

In case of an economic downturn over the period the extra productivity generated could also be used to increase margin
Key messages

- High quality pure play business delivering consistent financial outperformance
- Further growth with increasing profitability ahead, to 2021 and beyond
- Clear and disciplined capital allocation policy
- Delivering attractive returns for shareholders
