Product Notice for Alstom Grid Prima & MiDOS relays

To all Customers:

Due to increased prices and longer than expected lead times from our supplier, Alstom Grid, Schneider Electric is phasing out the sale of the following Alstom Grid (AG) product lines starting June 1, 2013. We regret any inconvenience this may cause.

The relay lines and product offerings affected are listed below. Please note that this is not an exhaustive list.

- MiDOS Relays (e.g. MMLB, MMLG, MCAA, MVAA, MVAJ, MVAW, MVAX, MFAC, and MVTT)
- Prima Relays (and their base)
- Battery Alarms
- Measurement IEDs and Switches (e.g. M57x, M87x, M2x3, M232, and rotary switches)
- Electromechanical Relays (e.g. KVFG, KBCH, KCGG, KAVR, KVTR, KAVS, and KCEG)
- DIP 5000

In an effort to provide an alternative for the AG products, Schneider Electric will be offering relays from Relay Monitoring systems (RMS). Although the replacements are not identical, they share similar specifications, are priced more favorably and have improved lead times of 8 weeks. Please see below for a complete cross reference with links for more info. Please contact product.quotationpct@schneider-electric for a quote or pmo.support@schneider-electric.com for more information.
